

Introducing the Iowa Black Powder Federation (I.B.P.F.) raffle rifle 2025.

Inspired by original rifles from the Virginia area (circa. 1760's). The components were secured from Kibler Longrifles, a company well known for their historic accuracy and extreme high quality. Final assembly, carving and finish were expertly provided by Mike "Box" Compton, a recognized and well respected muzzleloading 'smith and accomplished muzzleloading shooting competitor. To compliment the architecture of this fine rifle Mr. Compton also took his carving inspiration from an early American Virginia rifle. This curly maple stocked .45 caliber flintlock sports a 39 3/4" swamped barrel, weighs in at a modest 8 lbs. Additional enhancing features include a wooden patchbox with neatly engraved sideplate, lock and trigger guard. This rifle truly embodies the beauty, practicality and durability demanded by both the hunters and scouts of early America.

The lucky winner will enjoy the appearance of this rifle as well as it's most pleasant handling characteristics, be it in the woods or at the range. Also included will be a hard case for protection and transportation as well as complimentary range rod for loading and cleaning.

Thank you for participating and good luck
